

Equine Castration Clinic

Tuesday 22 September 2015
from 9am to 2pm

at HorseWorld, Staunton Manor Farm, Staunton Lane, Bristol. BS14 0QL

Castration

£80 for onsite castration – minimum age of horse 6 months (both testicles MUST have descended, whatever age the horse)

Including onsite pre and post op checks, discharge pack (with antibiotics and Bute as required).

Also includes microchip and passport if the horse doesn't have them.

Booking in advance is required, with £40 deposit to secure a place.

Why castrate your colt?

It is much easier to sell a gelding on the open market. Many people do not have the facilities or the experience to own a stallion, and will only consider buying geldings or mares. Geldings can therefore sell for much more money than colts.
